

How Ohm's Law Obligates Formation Of A Basic Social Structure.

CHAPTER NINE

Ohm's Law Of Authority.

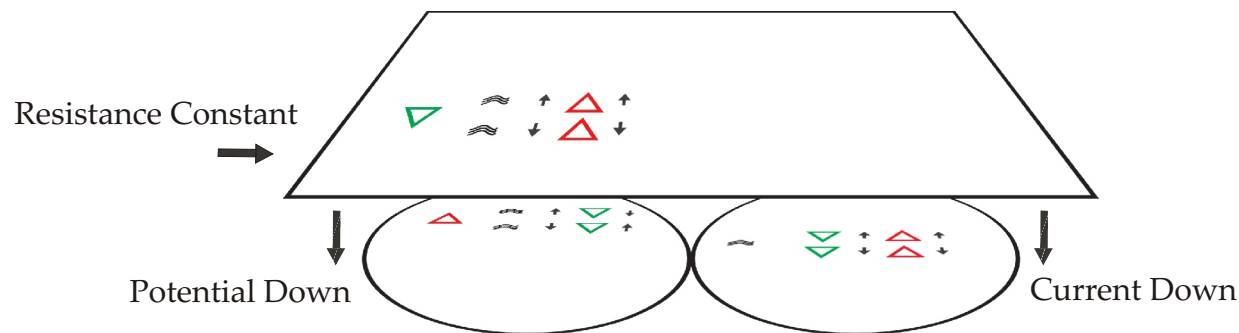

KEY		
<u>Traditional Ohm's Law</u>		<u>Expanded</u>
Potential Difference		Discipline
Current		Enforcement
Resistance		Regulation

The Story.

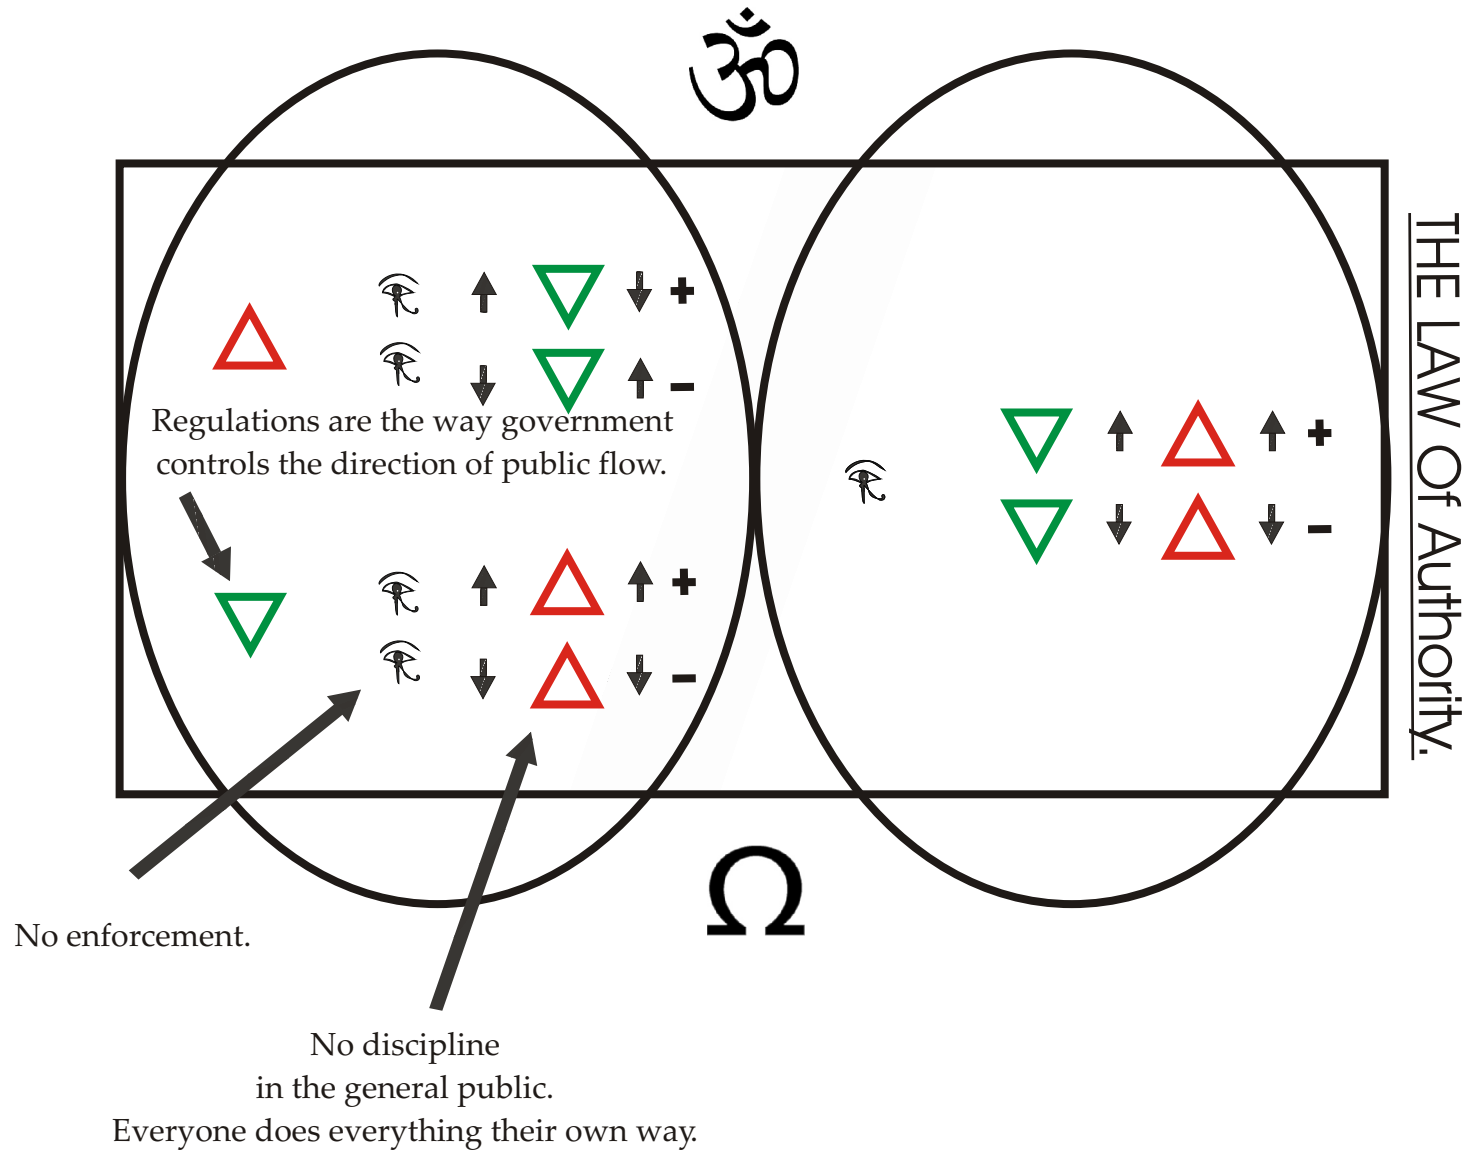

With the willingness to draw blood established a tone is set...

“Let everyone see the justice stability demands!”

Those in power can make all the rules they desire
if the resources do not permit enforcement
discipline remains unestablished
and eventually decreases.

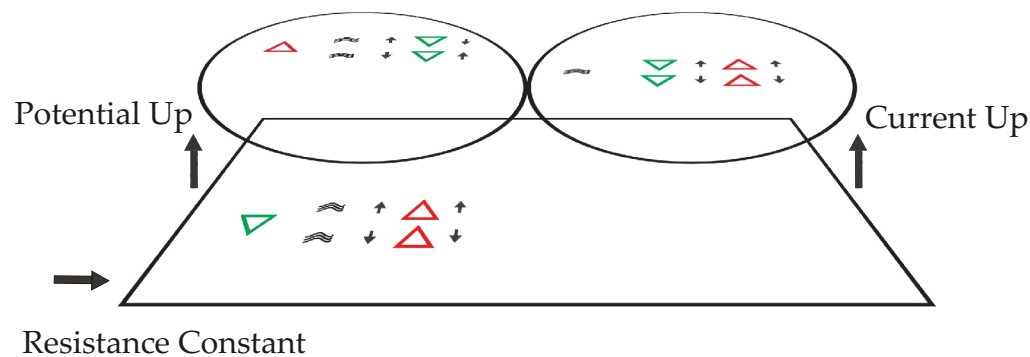

OHM's Guide.

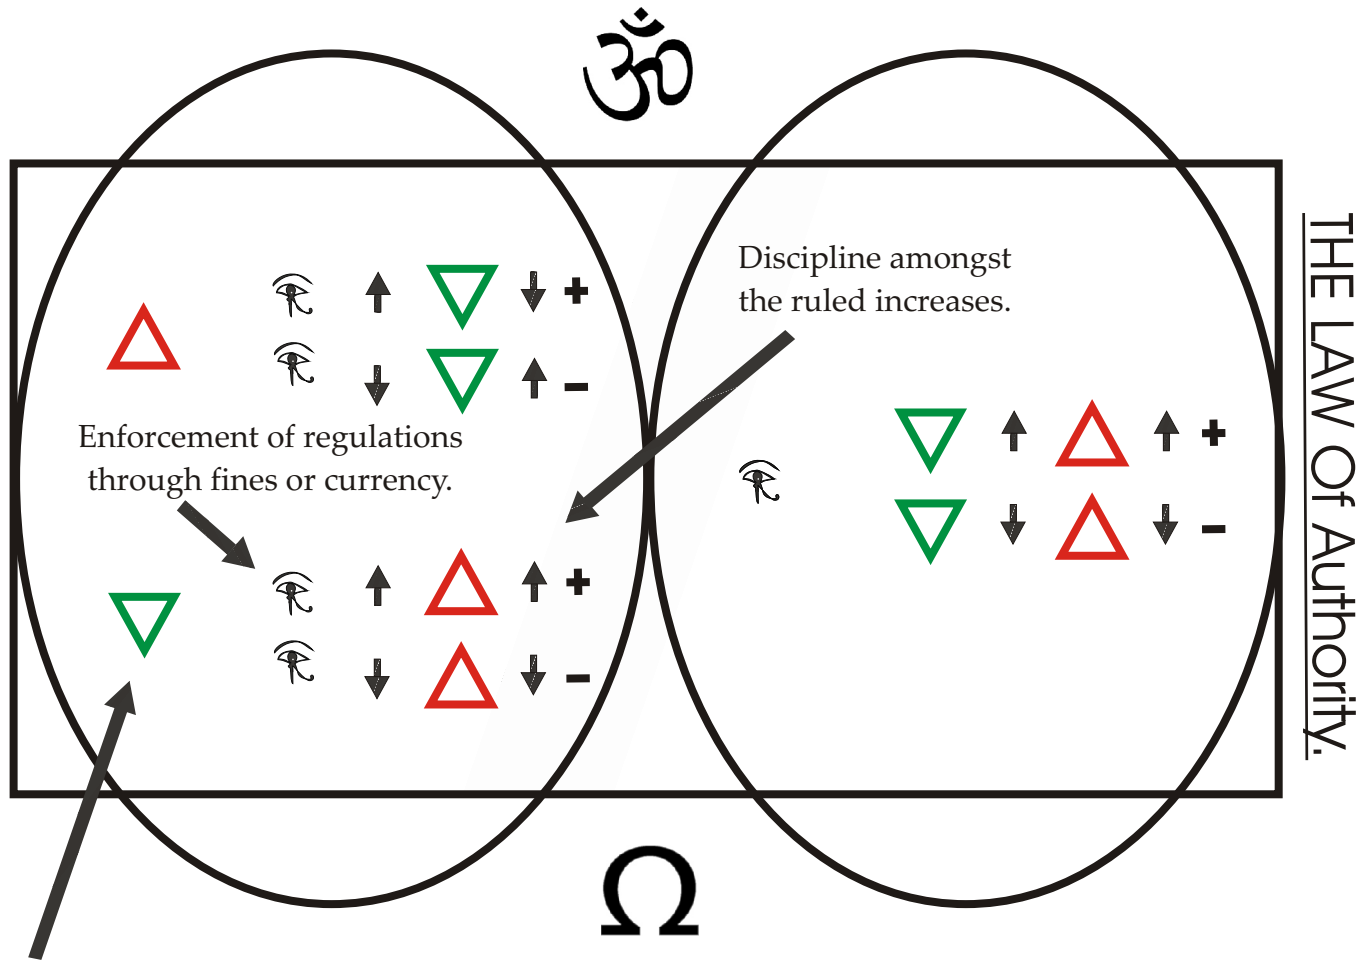

The Story.

Crime begets regulation.

Once some actions are deemed illegal
as enforcement of the rules increases
so does the discipline of the general public.

OHM's Guide.

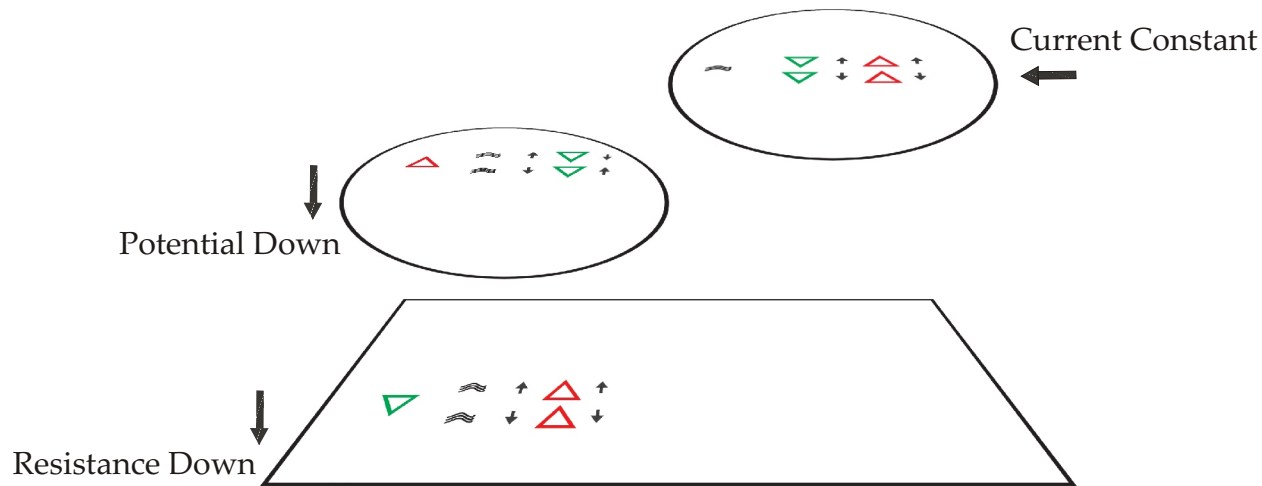

Regulations are the way government controls direction of public flow.

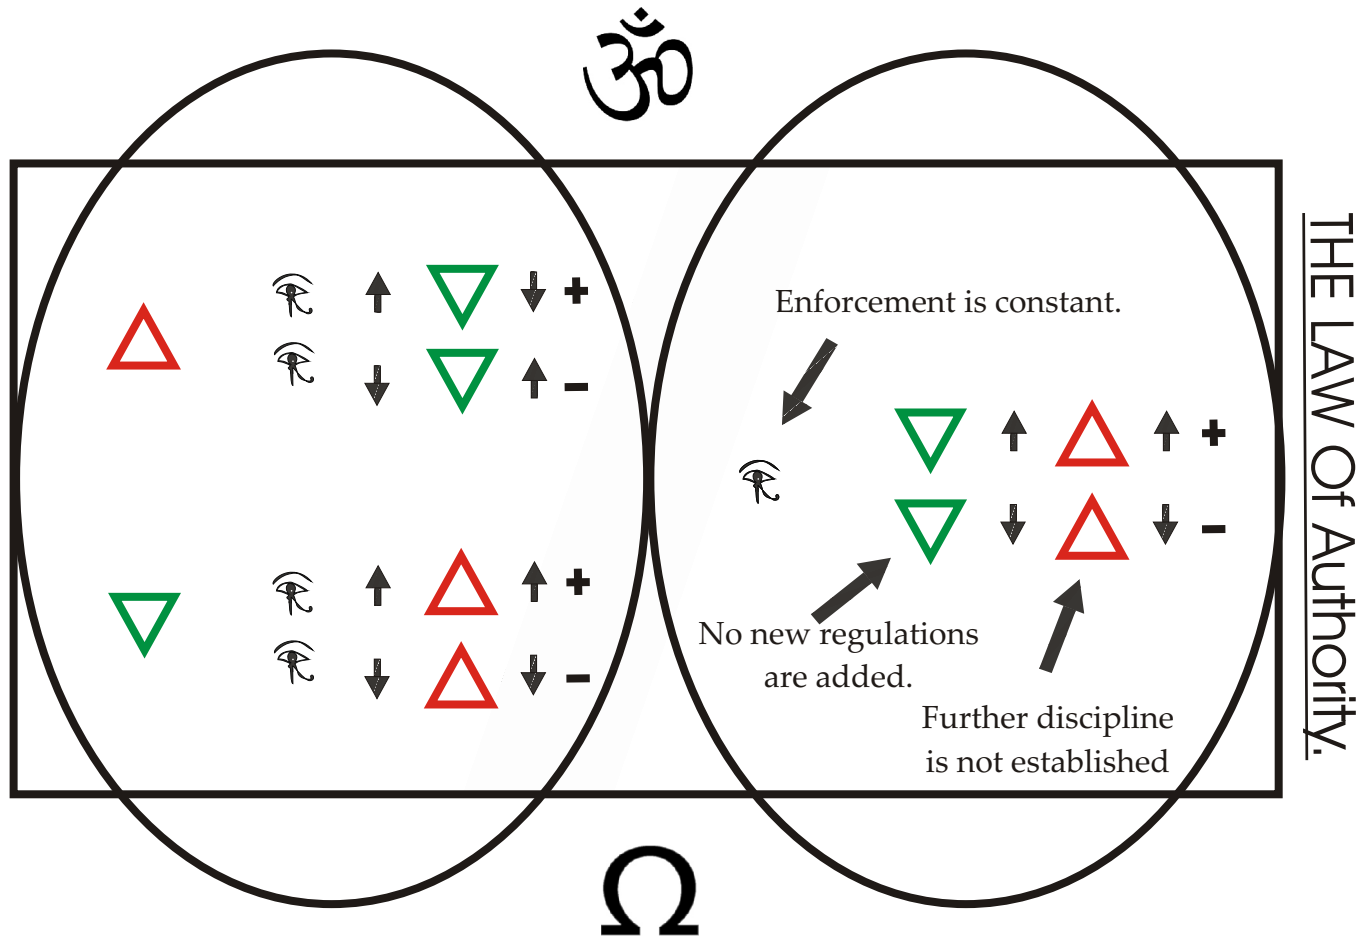

The Story.

If a bureaucracy of enforcers has nothing to enforce
the general public will return to
their subconscious default of
path of least resistance.

Avoidance of any task or responsibility
that does not bring immediate gratification.

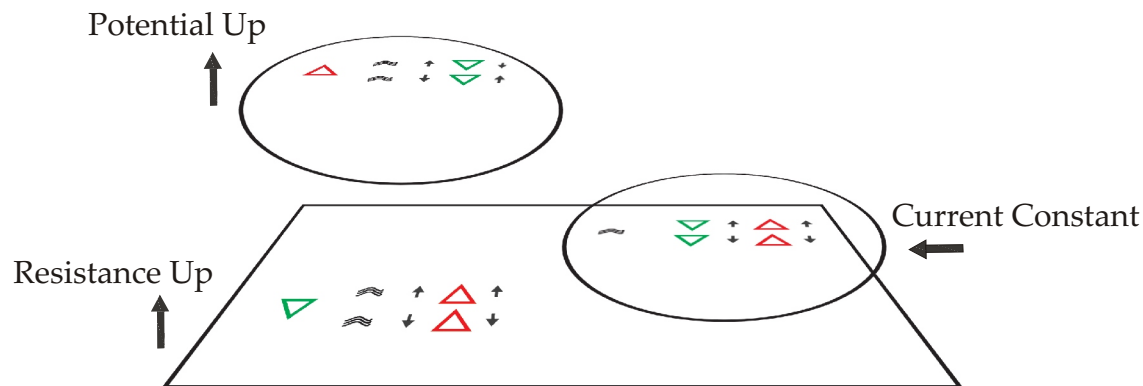

OHM's Guide.

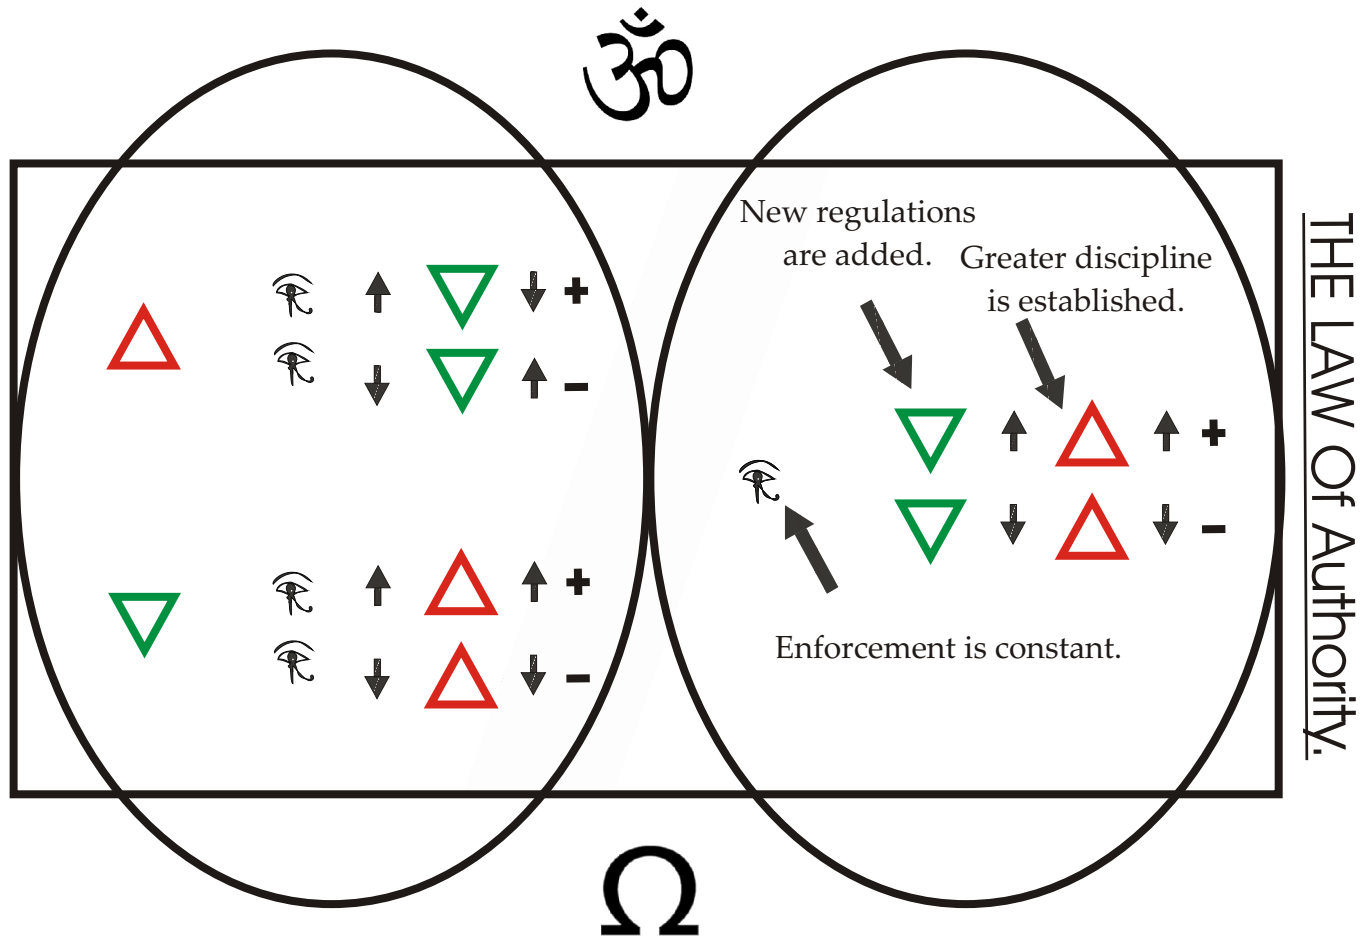

The Story.

Once a constant system and policy of enforcement is established the more regulations created the more responsible the general public becomes.

Control over the masses through discipline increases.

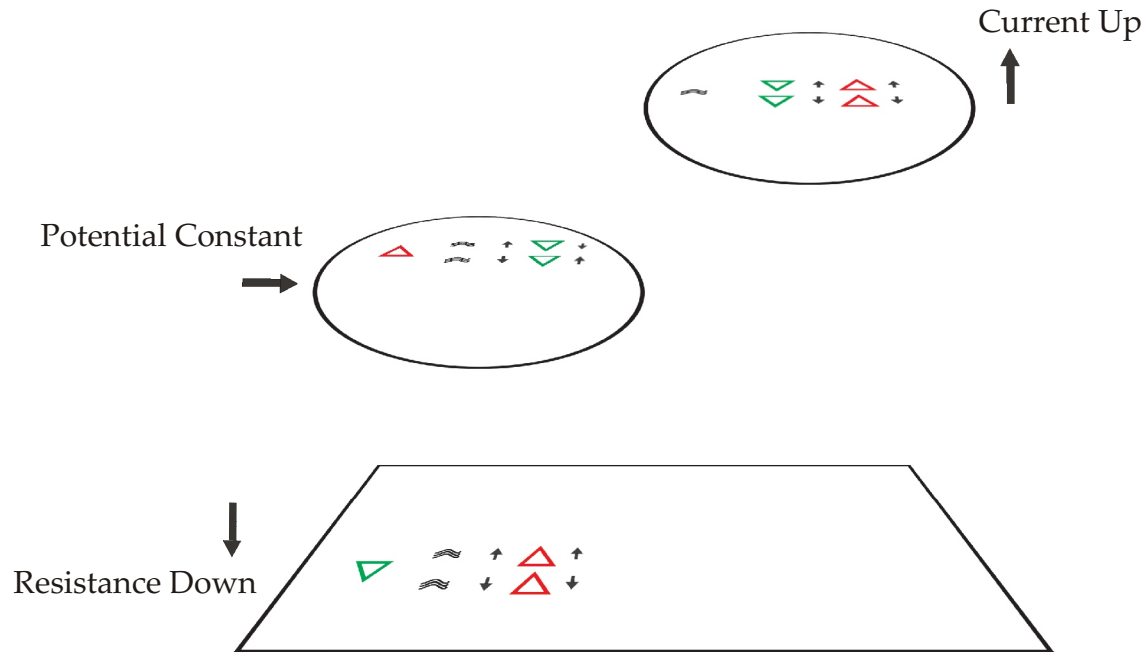

OHM's Guide.

The Story.

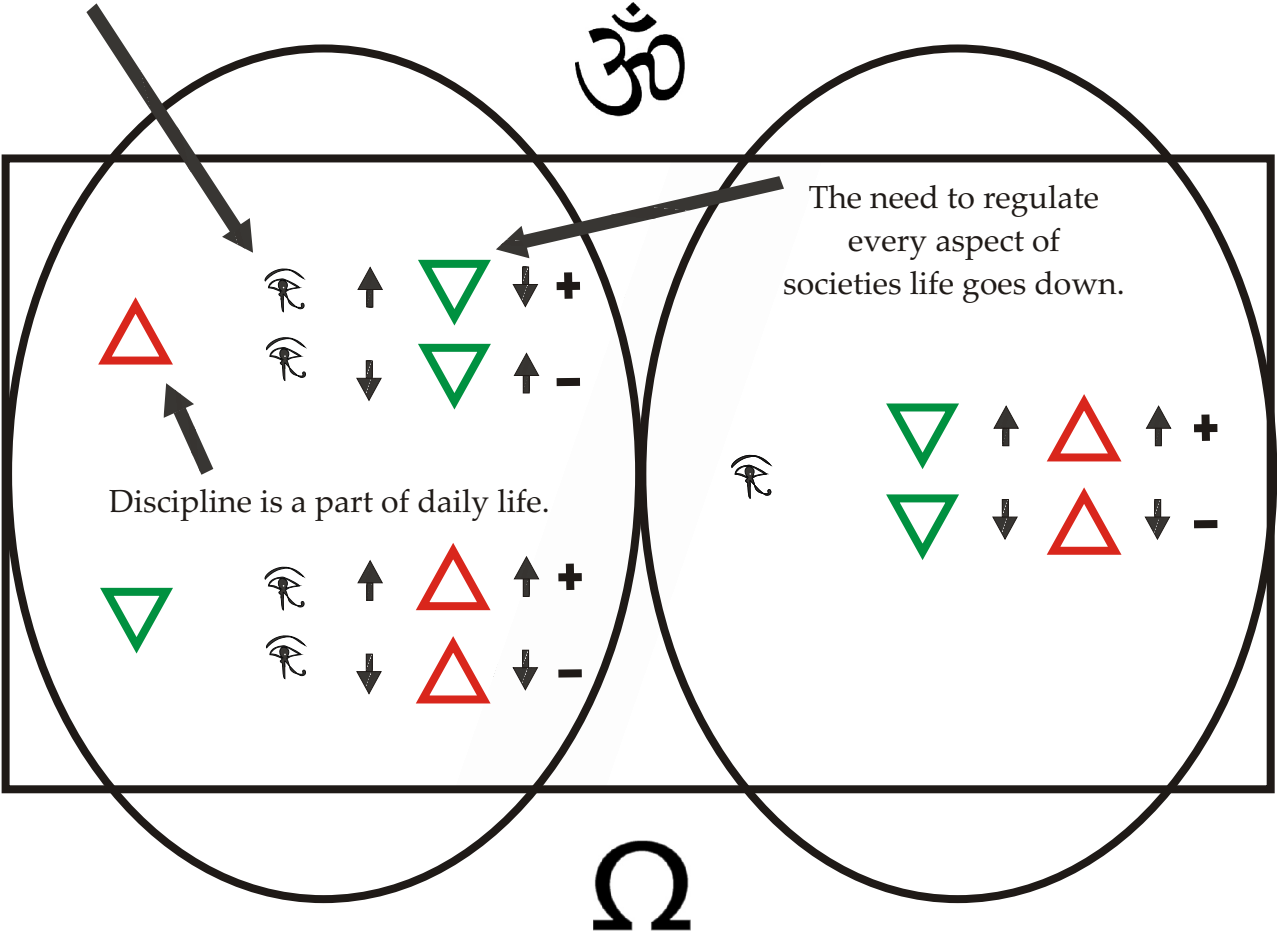

Once a responsible, disciplined social group is established, the rules, now a community standard, become increasingly enforced by the herd itself.

This reduces the need for official regulation.

OHM's Guide.

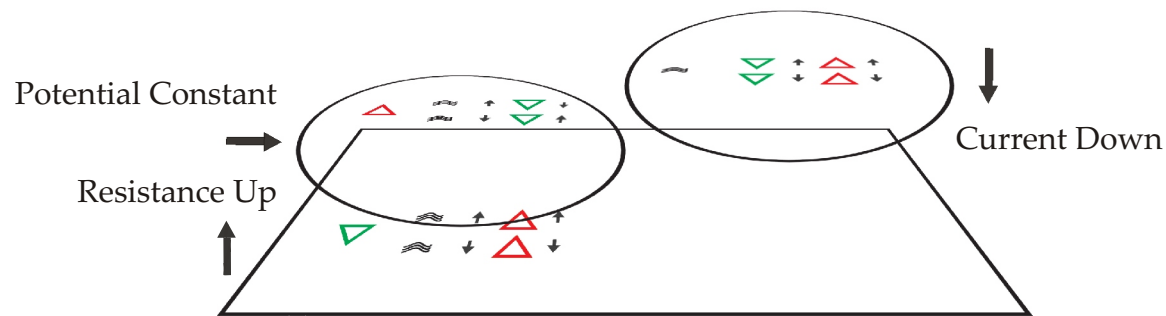

As enforcement of the rules increases.

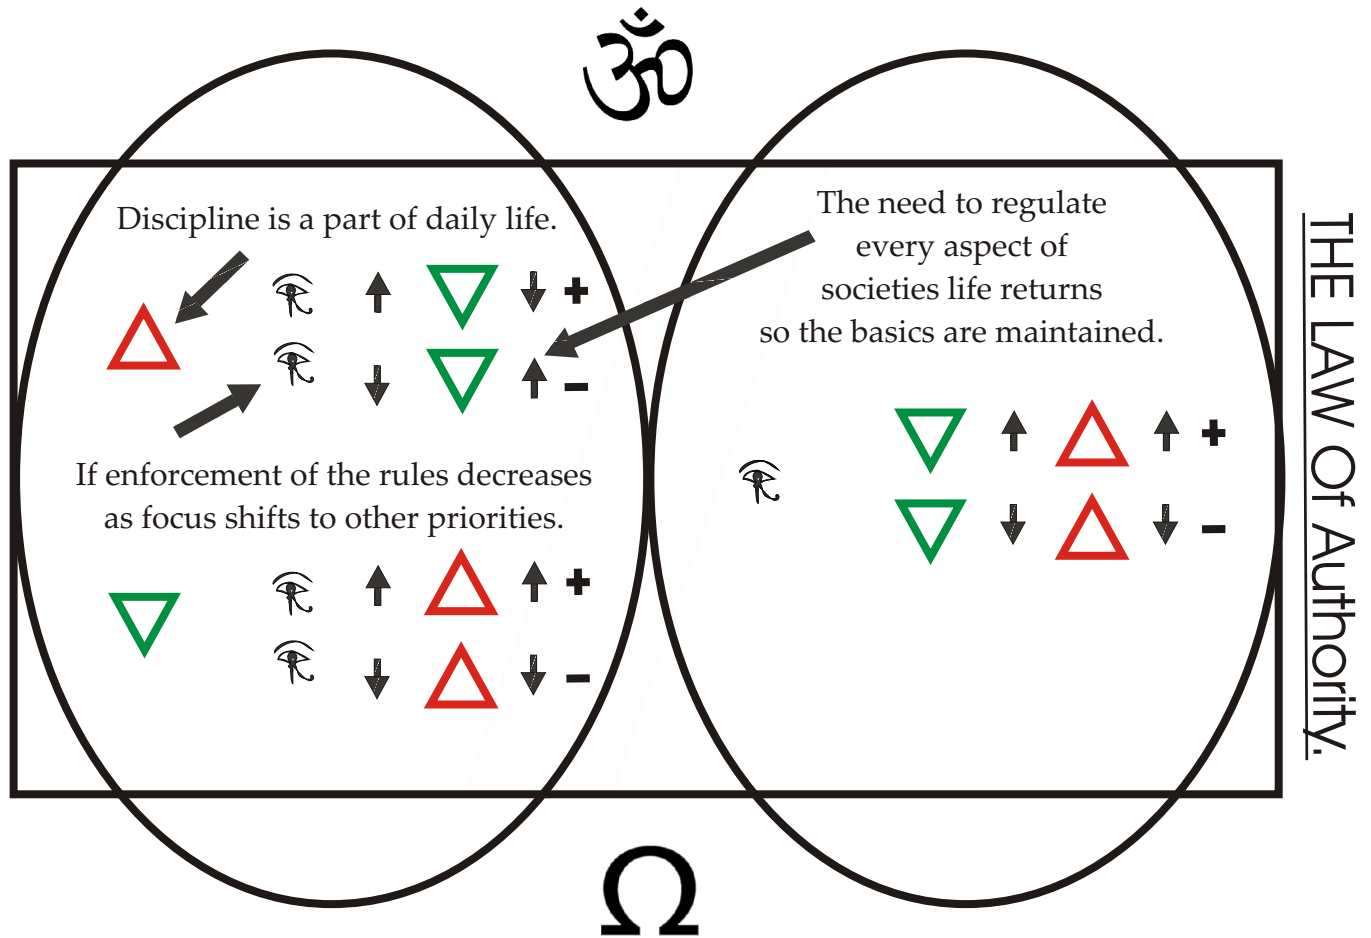

The Story.

No matter how disciplined the individual is
if either the group or authorities
stop enforcing the rules
focus is split
amongst the increasingly complex
requirements society places on the individual.

A need for regulation returns.

OHM's Guide.

This is the process by which
a bureaucratic group within the group
is established to maintain control
over the rest.

Once established the group
moves into yet another phase of development.

This lesson will stop here
as its intention was to show the development of
a “basic” social structure.

Though the variables continue to change
as the group dynamic evolves
rest assured
the same basic pattern repeats.
