

How Ohm's Law Obligates Formation Of A Basic Social Structure.

CHAPTER FIVE

Ohm's Law Of Survival.

KEY		
<u>Traditional Ohm's Law</u>		<u>Expanded Ohm's Law</u>
Potential Difference		Cooperation
Current		Innovation
Resistance		Competition

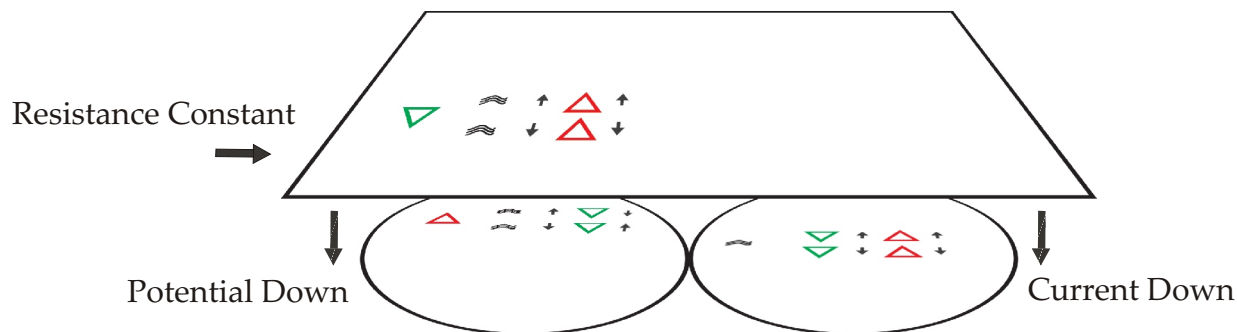

The Story.

Others seeking established comforts prey.

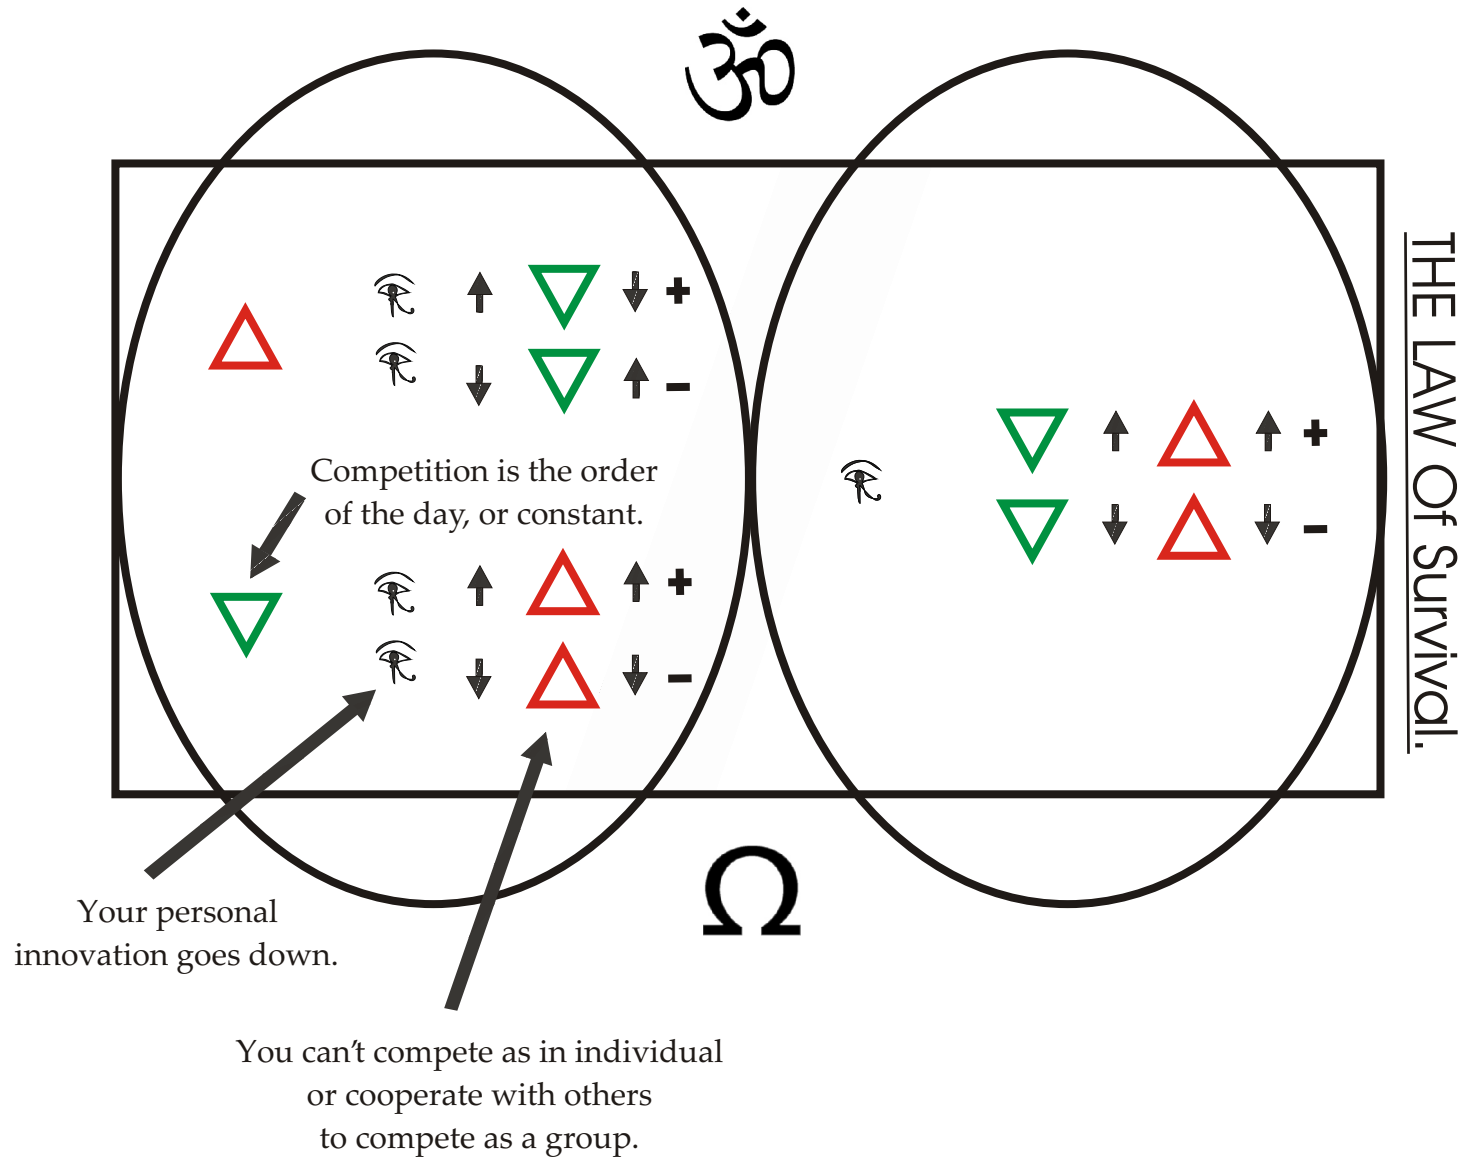

The first war forever changes the environment...

...by strengthening the group.

If competition is established or constant
and you cannot compete or work with others
you have no time to innovate
because you are always fleeing.

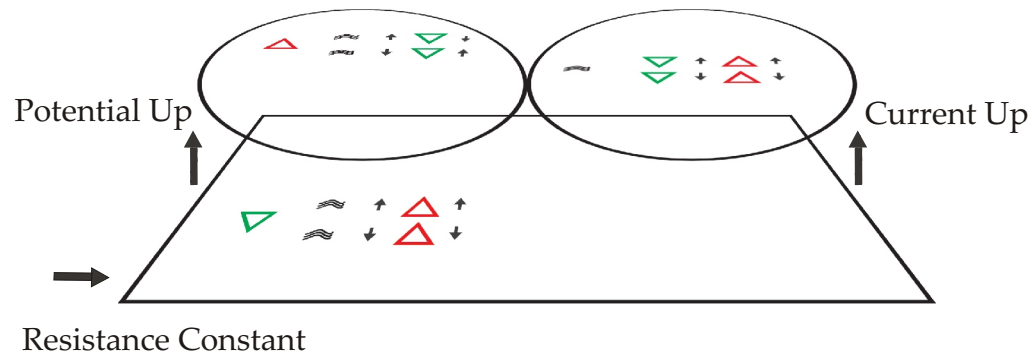

OHM's Guide.

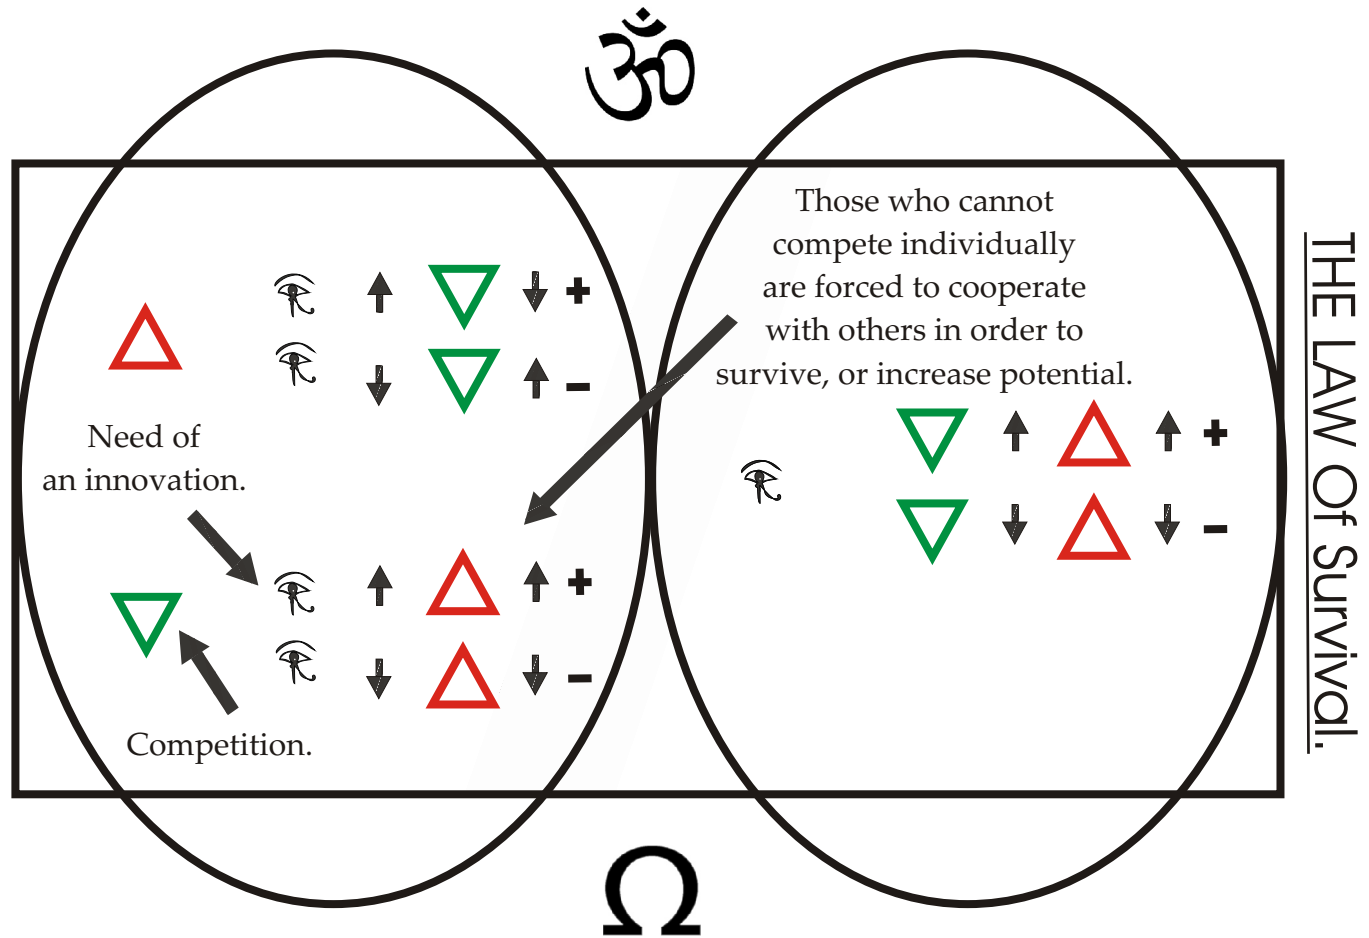

The Story.

If competition is the order of the day
those who cannot compete, but can work together,
will be forced to create innovative tools for survival.

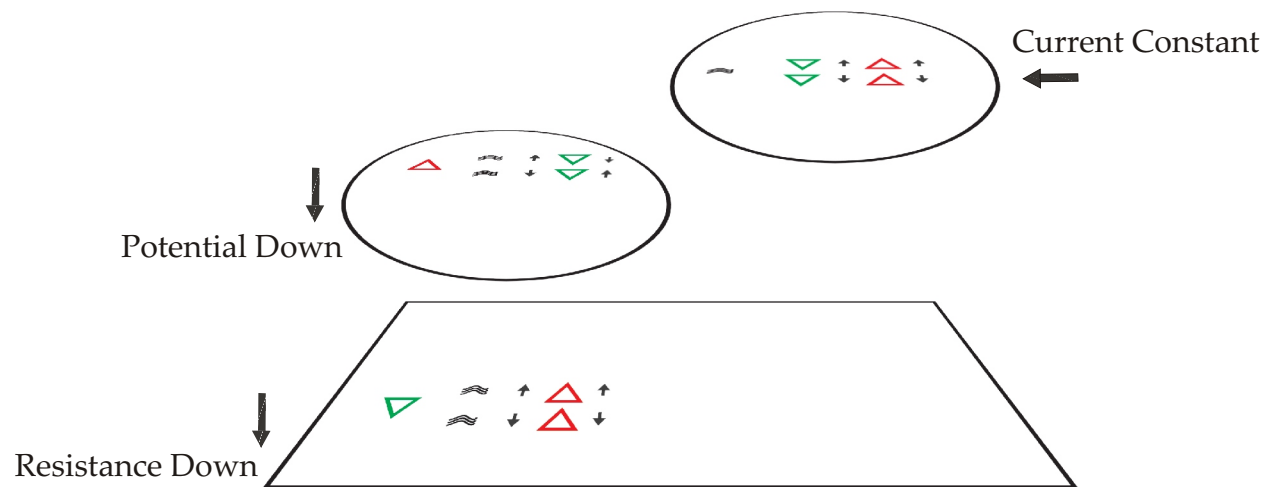

OHM's Guide.

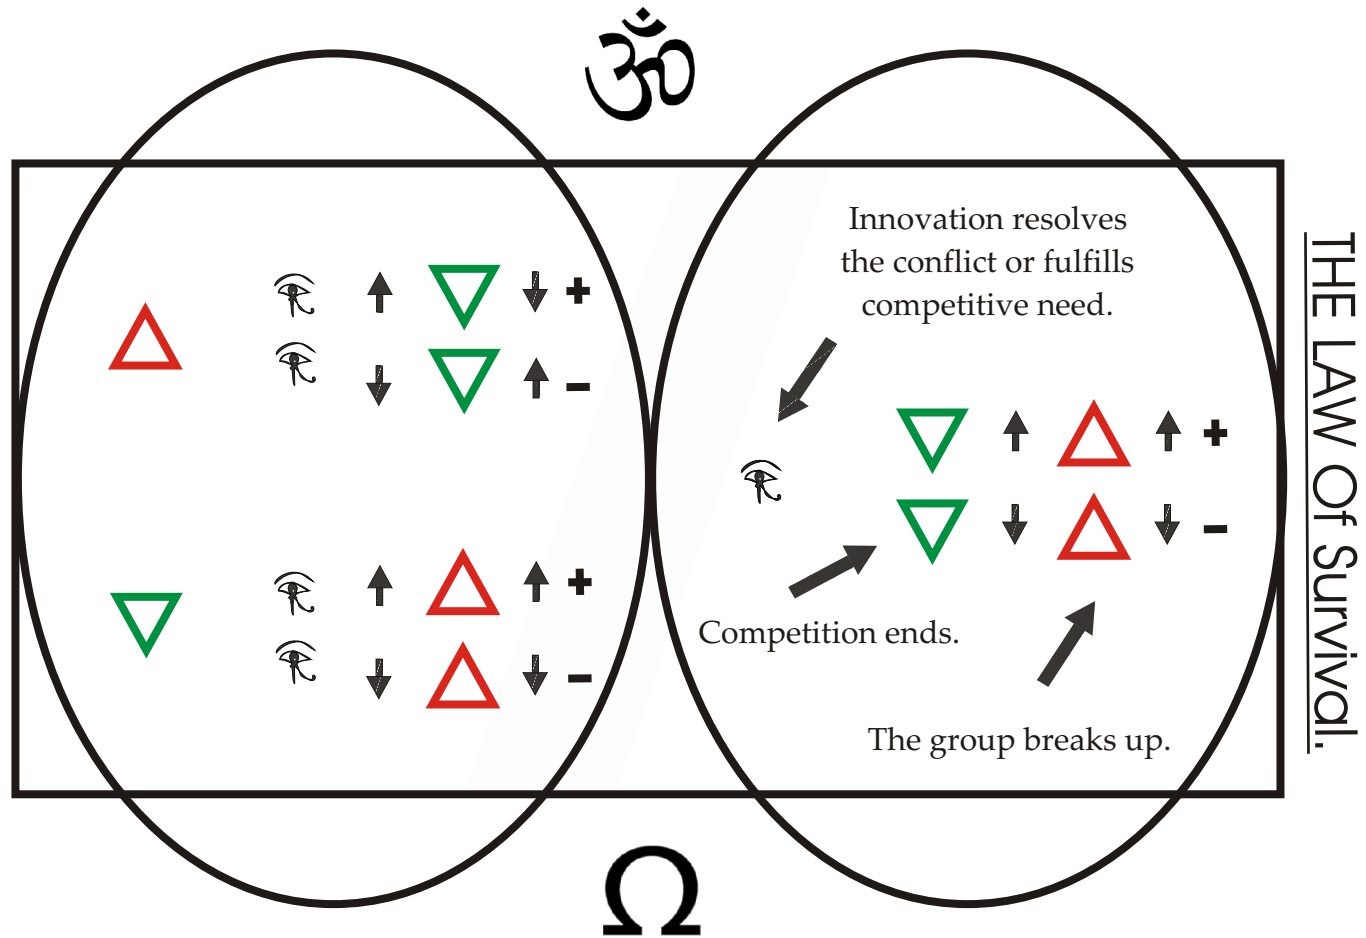

The Story.

If a single innovation is enough
to resolve the competitive state
a slide back to meeting the unconscious needs
of basic survival splits up the cooperative group.

Everyone goes back to looking out for themselves.

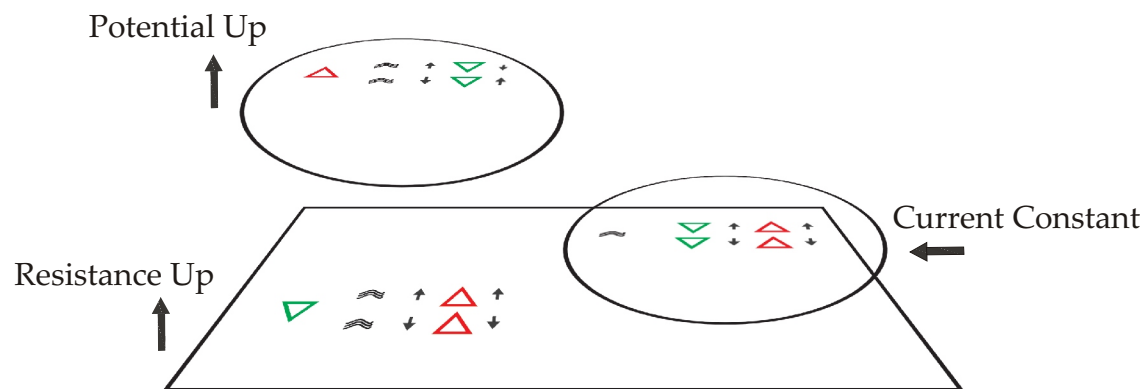

OHM's Guide.

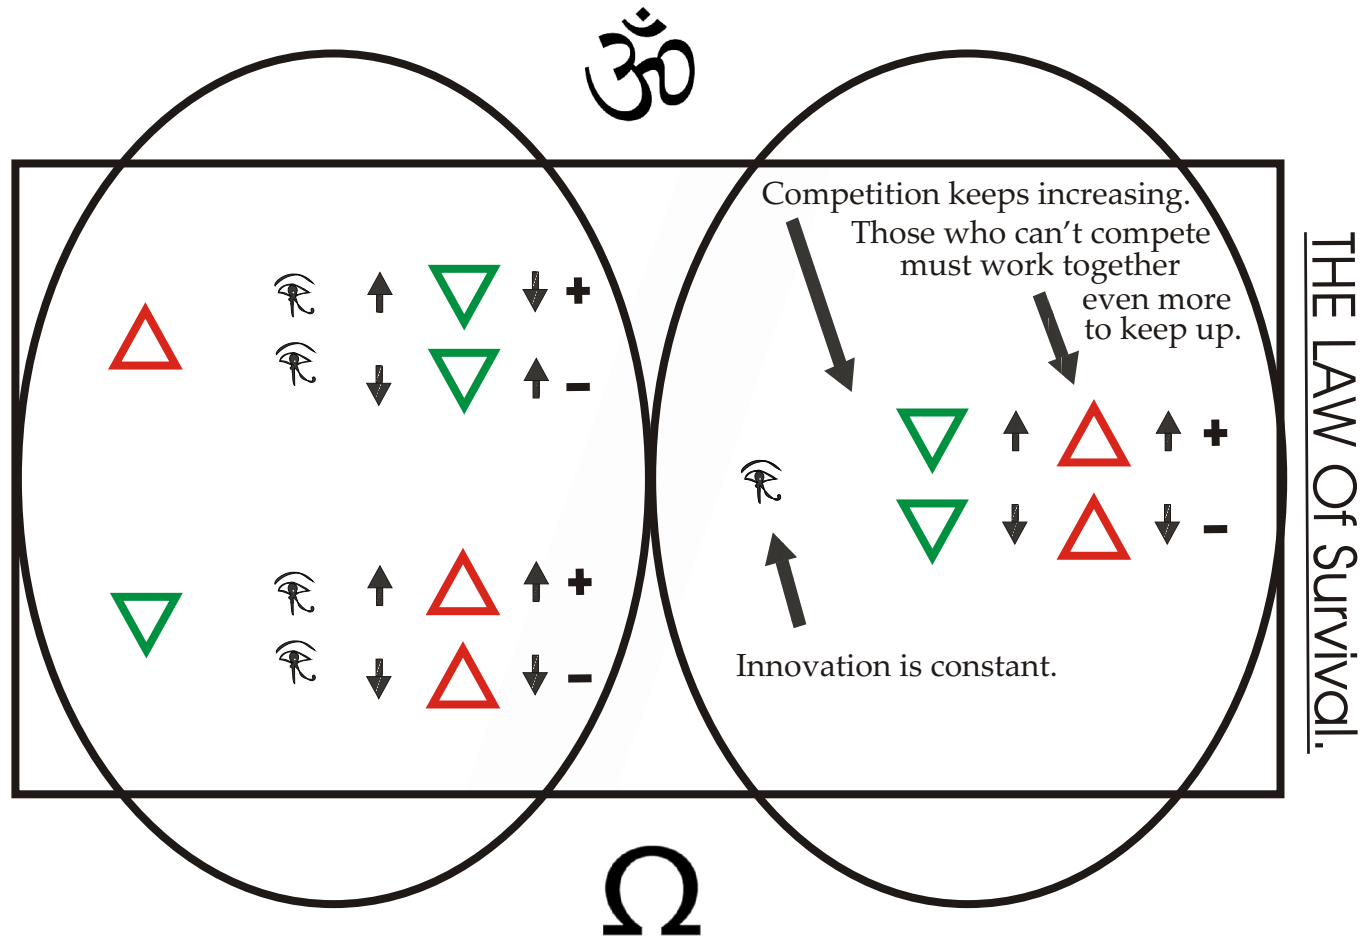

The Story.

Once the wave of innovation is established,
the harder the competitors push
the more people are forced to work together.

This builds until cooperative alliances are forced
even amongst the competitors.

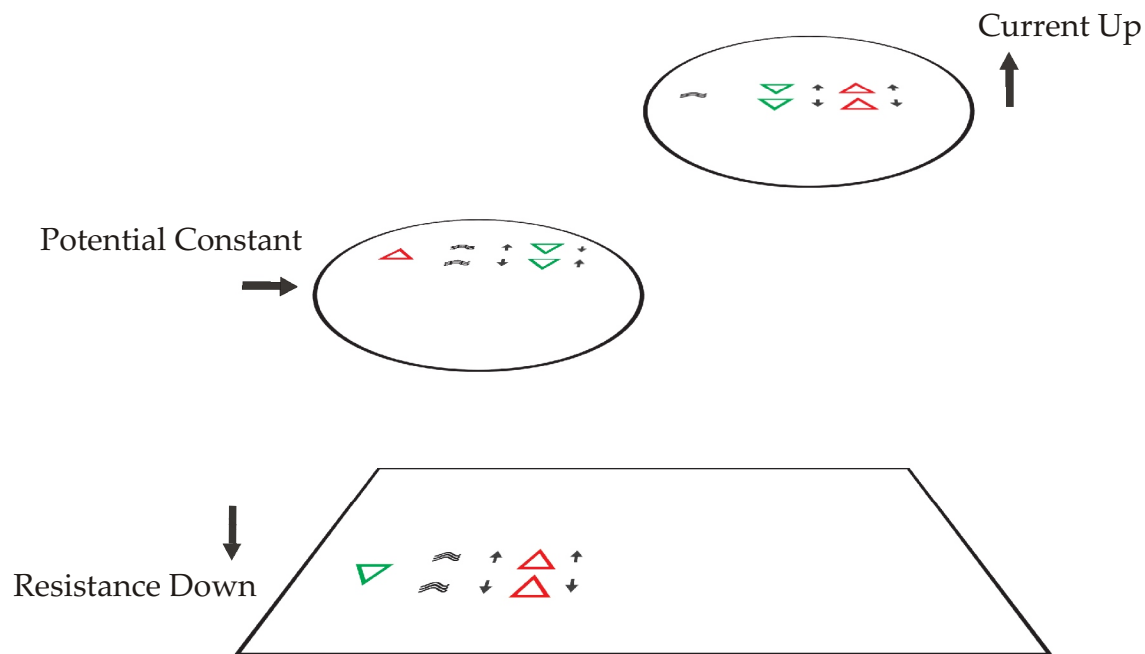

OHM's Guide.

The Story.

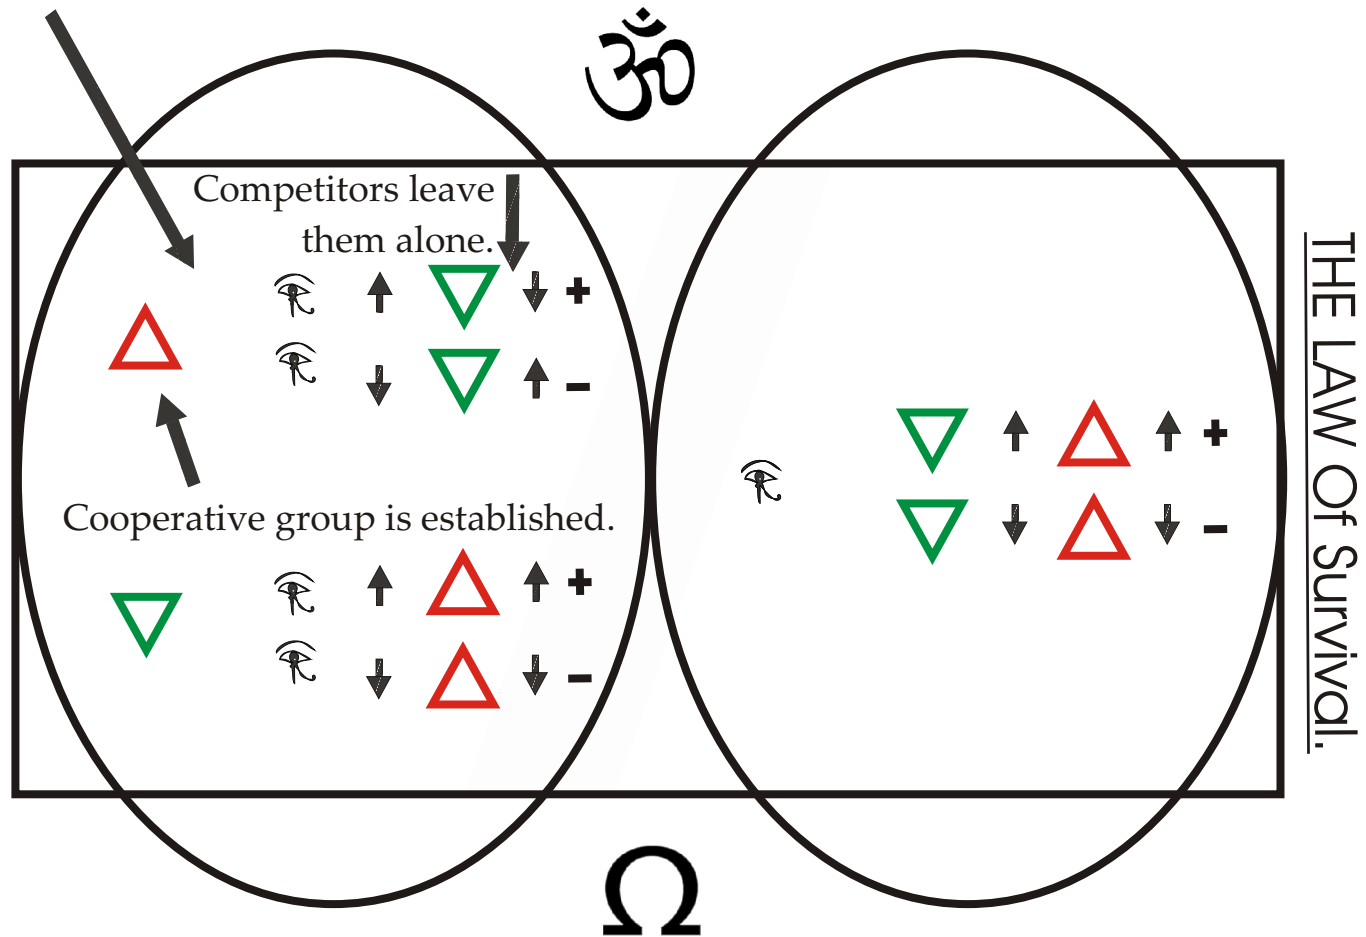

Once the cooperative group is established,
or committed to staying together,
as they become more innovative
the barbarians are warded off.

Next, being more aware, they realize together,
they can overcome other resistances.

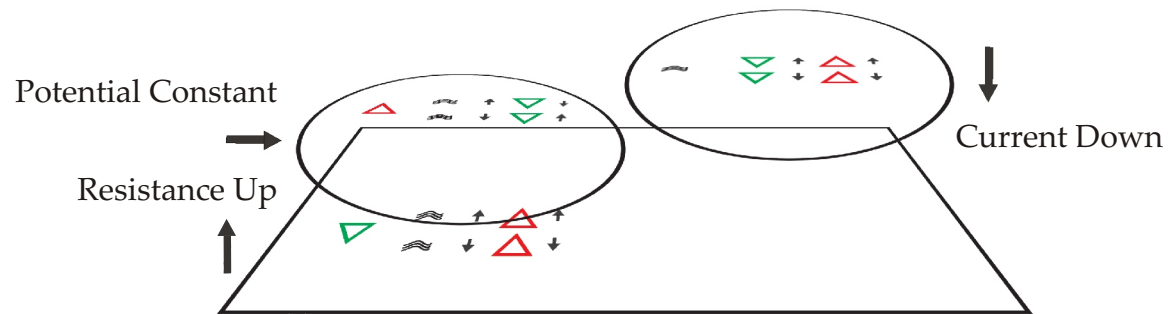

The groups personal innovation increases.

OHM's Guide.

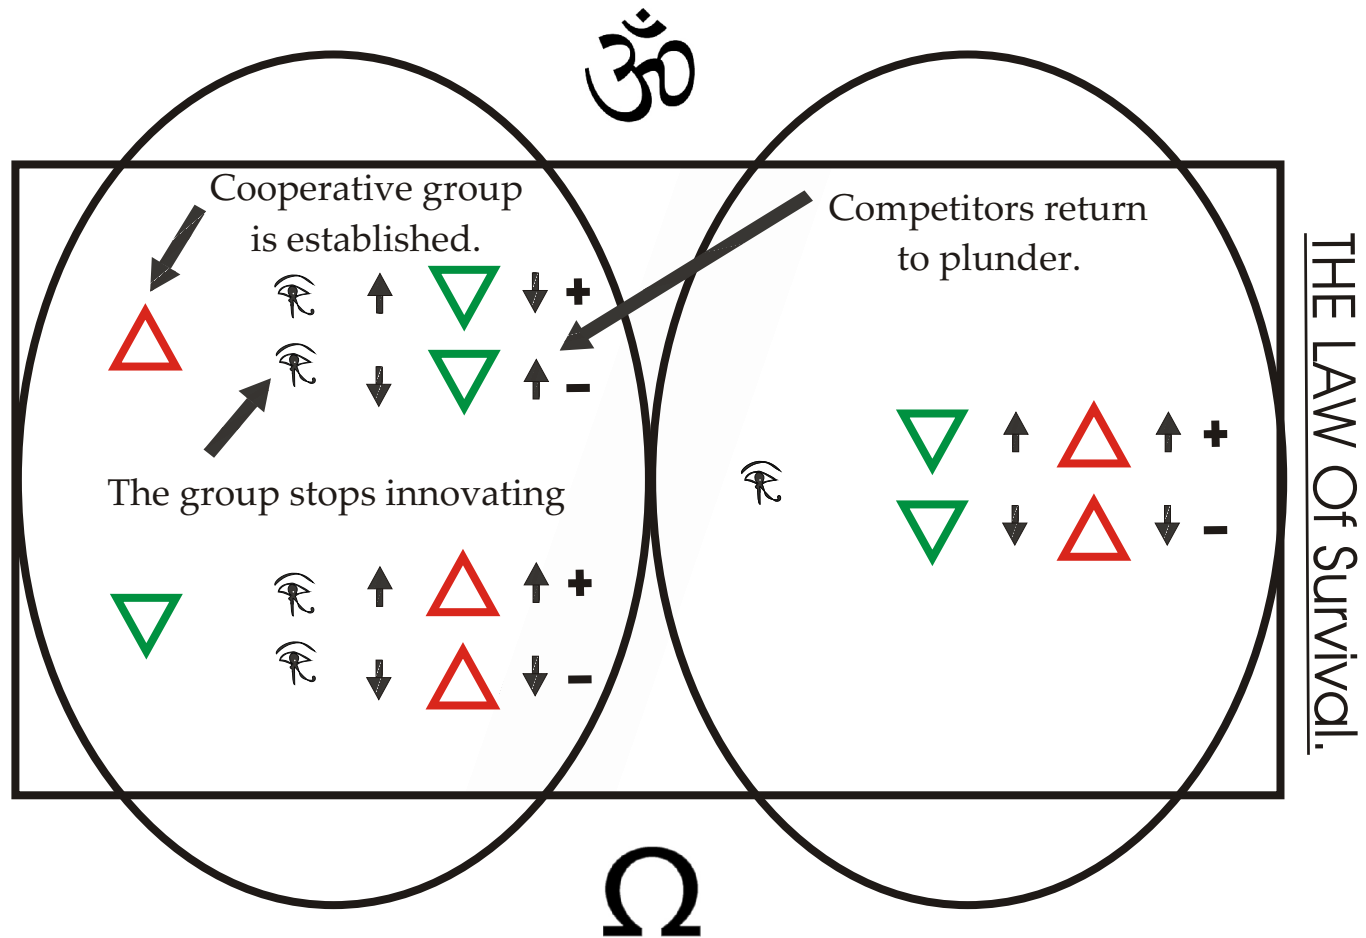

The Story.

If the cooperative group stops innovating eventually the barbarians return and use their own innovation against them.

OHM's Guide.

This is the foundation of
basic group dynamics.

Once the group has mastered this
they move into the next phase of development.

Though the variables change
the same basic pattern repeats.
